

RAJDEEP SINGH

MIS Analyst | Data Analyst | rajdeepsingh.vercel.app/

+91-9026749587 | rajgraduated@gmail.com | linkedin.com/in/rajdeepsingh_ | github.com/rajgraduated-data

PROFESSIONAL SUMMARY

Computer Science graduate with project-based experience in MIS reporting, data analytics using Python, SQL, Advanced Excel, and Power BI. Skilled in automated MIS dashboards, scheduled reporting pipelines, and delivering executive-ready insights. Certified by Simplilearn and Deloitte. Seeking a Fresher MIS Analyst or Data Analyst role.

TECHNICAL SKILLS

MIS & Reporting: MIS Reporting, Automated Dashboard Reporting, Scheduled Report Distribution, KPI Tracking, Report Automation

Analytics & BI: Power BI (DAX, Data Modelling), Advanced Excel (Pivot Tables, VLOOKUP/INDEX-MATCH, Macros, VBA), EDA

Programming & DB: Python (Pandas, NumPy), SQL (MySQL, PostgreSQL – Joins, Aggregations, Subqueries), Power Query

Tools: Jupyter Notebook, VS Code, Git & GitHub, MS Office Suite

Languages: English (Professional), Hindi (Native)

PROJECTS

Automated Payroll – Advanced Excel

Excel, Advance Excel, Conditional Formatting, VLOOKUP and more

- Developed an automated Excel-based payroll system for 30+ employees, integrating daily attendance tracking with dynamic salary calculations to eliminate manual errors and reduce monthly processing time.
- Engineered complex formulas to compute variable compensation, including prorated wages, overtime pay, and statutory deductions (PF, ESI), ensuring accurate and compliant net salary disbursement.
- Designed an interactive payslip generator that auto-populates earnings and deductions via a single Employee ID input, streamlining HR reporting and document distribution.

Retail Sales Data Analysis – Python

Python, Pandas, NumPy, Power BI, Kaggle

- Analysed transaction data for 96,000+ customers using Python, implementing automated RFM (Recency, Frequency, Monetary) scoring to accurately segment purchasing behaviour and identify high-value versus at-risk cohorts.
- Developed an interactive Power BI dashboard visualizing key customer metrics, segment distribution, and revenue contribution, enabling data-driven marketing strategies and targeted retention campaigns.
- Engineered a quintile-based segmentation model categorizing users into 6 distinct groups (e.g., Champions, At Risk, Lost), directly supporting churn prediction and personalized customer engagement initiatives.

EDUCATION

B.Tech – Computer Science & Engineering | AKTU, Lucknow

Graduated: May 2026

CERTIFICATIONS

Data Analytics Job Simulation – Deloitte

2026

Completed real-world analytics tasks simulating a Deloitte Data Analyst role; worked with real data, and dashboard creation. (Deloitte-issued certificate)

Data Analytics – Google

2026

Covered end-to-end data analytics lifecycle: data cleaning, Use of Python, data visualization, Use of SQL, and business insights delivery.

Advanced Microsoft Excel – Simplilearn

2026

Advanced Excel functions, Pivot Tables, data validation, MIS dashboard design, and report automation using Macros and VBA.
